

SAIARD

**YOUNG
RESEARCHERS
COMPETITION**

Be the real time problem solver

Concept

The concept of young researchers competition involves encouraging and promoting research among young people, typically between the ages of 18-30. The competition provides a platform for young researchers to showcase their research ideas, methodologies, and findings, while also providing an opportunity to learn from other researchers and industry experts.

The competition has designed with some specific themes, such as social justice, health and wellness, climate change, or any other relevant topics which actually focuses to our real time, day to day problems. Participants are required to submit their research papers for review and evaluation by a panel of judges. The selected participants are then invited to present their research in front of a live audience, either in-person or virtually.

The competition offers many benefits to young researchers, such as developing research skills, building confidence, and gaining exposure to different research methodologies and approaches. It also provides an opportunity to connect with other researchers and industry experts, leading to potential collaborations, internships, publication and also to win a prize money.

Overall, the youth research competition is a great way to encourage and promote research among young people, and to inspire and empower the next generation of researchers to make a positive impact in their respective fields.
